U.S. Probation Officer Action:

On November 28, 2022, Mr. Alston was registered for the sober link device program and sanctioned for 45 days of random testing. Mr. Alston completed his 45-day sanction on January 12, 2023. During this 45-day period of the random testing program, Mr. Alston tested positive of alcohol on two occasions, December 24 and 31, 2022. On December 24, 2022, Mr. Alston had a blood alcohol content of 0.008 and on December 31, 2022, he had blood alcohol content of 0.025. Mr. Alston submitted a follow up re-take December 31, 2022 and had a blood alcohol content of 0.021. It should be noted Mr. Alston denies the use of any alcohol and informed the undersigned officer he had taken Nyquil on these dates because he was not feeling well. It has been determined that Nyquil medication can cause false positives for alcohol on drug tests. While participating in the sober link random testing program, Mr. Alston completed his outpatient substance abuse program at Trinitas Hospital in Elizabeth, New Jersey. The U.S. Probation Office will continue to monitor Mr. Alston with continued drug and alcohol testing and will notify the court of any additional non-compliance. We are respectfully requesting no Court action be taken but allow this notice to serve as a written reprimand from the Court.

Respectfully submitted,
